Dear Colleague

**Energy efficiency and impact of weather extremes on school activity**

Is your school energy efficient? Was your school affected by the "Beast from the East" in spring and by the heatwave during the summer?

We'd like to better understand what energy efficiency measures have been undertaken at your school and how the extreme cold and hot weather that we have seen this year have affected how your school operates.

We will be using this information to help us develop a vision for long-term energy and cost savings to schools and to inform our work around climate change and what we need to do to make sure we are prepared for what may come in the future.

Please follow [this link to access the survey](#).

Thank you for your help.

Yours sincerely

**STEVEN FALL**

Energy Manager  
West Sussex County Council  
Chichester County Hall
